

CA-BOOST

SHUTTLE 14

**INCREASES WATER PENETRATION AND DRAINAGE BY
LOOSENING COMPACTED SOILS / DECREASES HARMFUL
EXCESS SALTS / SAFE AND ENVIRONMENTALLY FRIENDLY**

Ca-Boost is a hyper-concentrated formulation engineered to reduce excess sodium content in soil, whilst increasing water penetration by loosening compacted media. Due to these soil-loosening properties, Ca-Boost also greatly improves soil drainage, which can provide relief to waterlogged turf.

The hyper-concentrated nature of Ca-Boost makes the treatment of compacted soil, easier and less expensive than ever before; a single gallon of Ca-Boost contains more available calcium than 800 pounds of granular gypsum.

APPLICATION

1 GALLON OF CA-BOOST CONTAINS MORE AVAILABLE CALCIUM THAN 800 POUNDS OF DRY GYPSUM. APPLICATION RATES WILL BE CONTINGENT UPON SOIL ANALYSIS.
